

# Milan Cares Initiative

Triad of Excellence

INDIANA INSTITUTE ON DISABILITY AND COMMUNITY  
**CENTER FOR COLLABORATIVE  
SYSTEMS CHANGE**

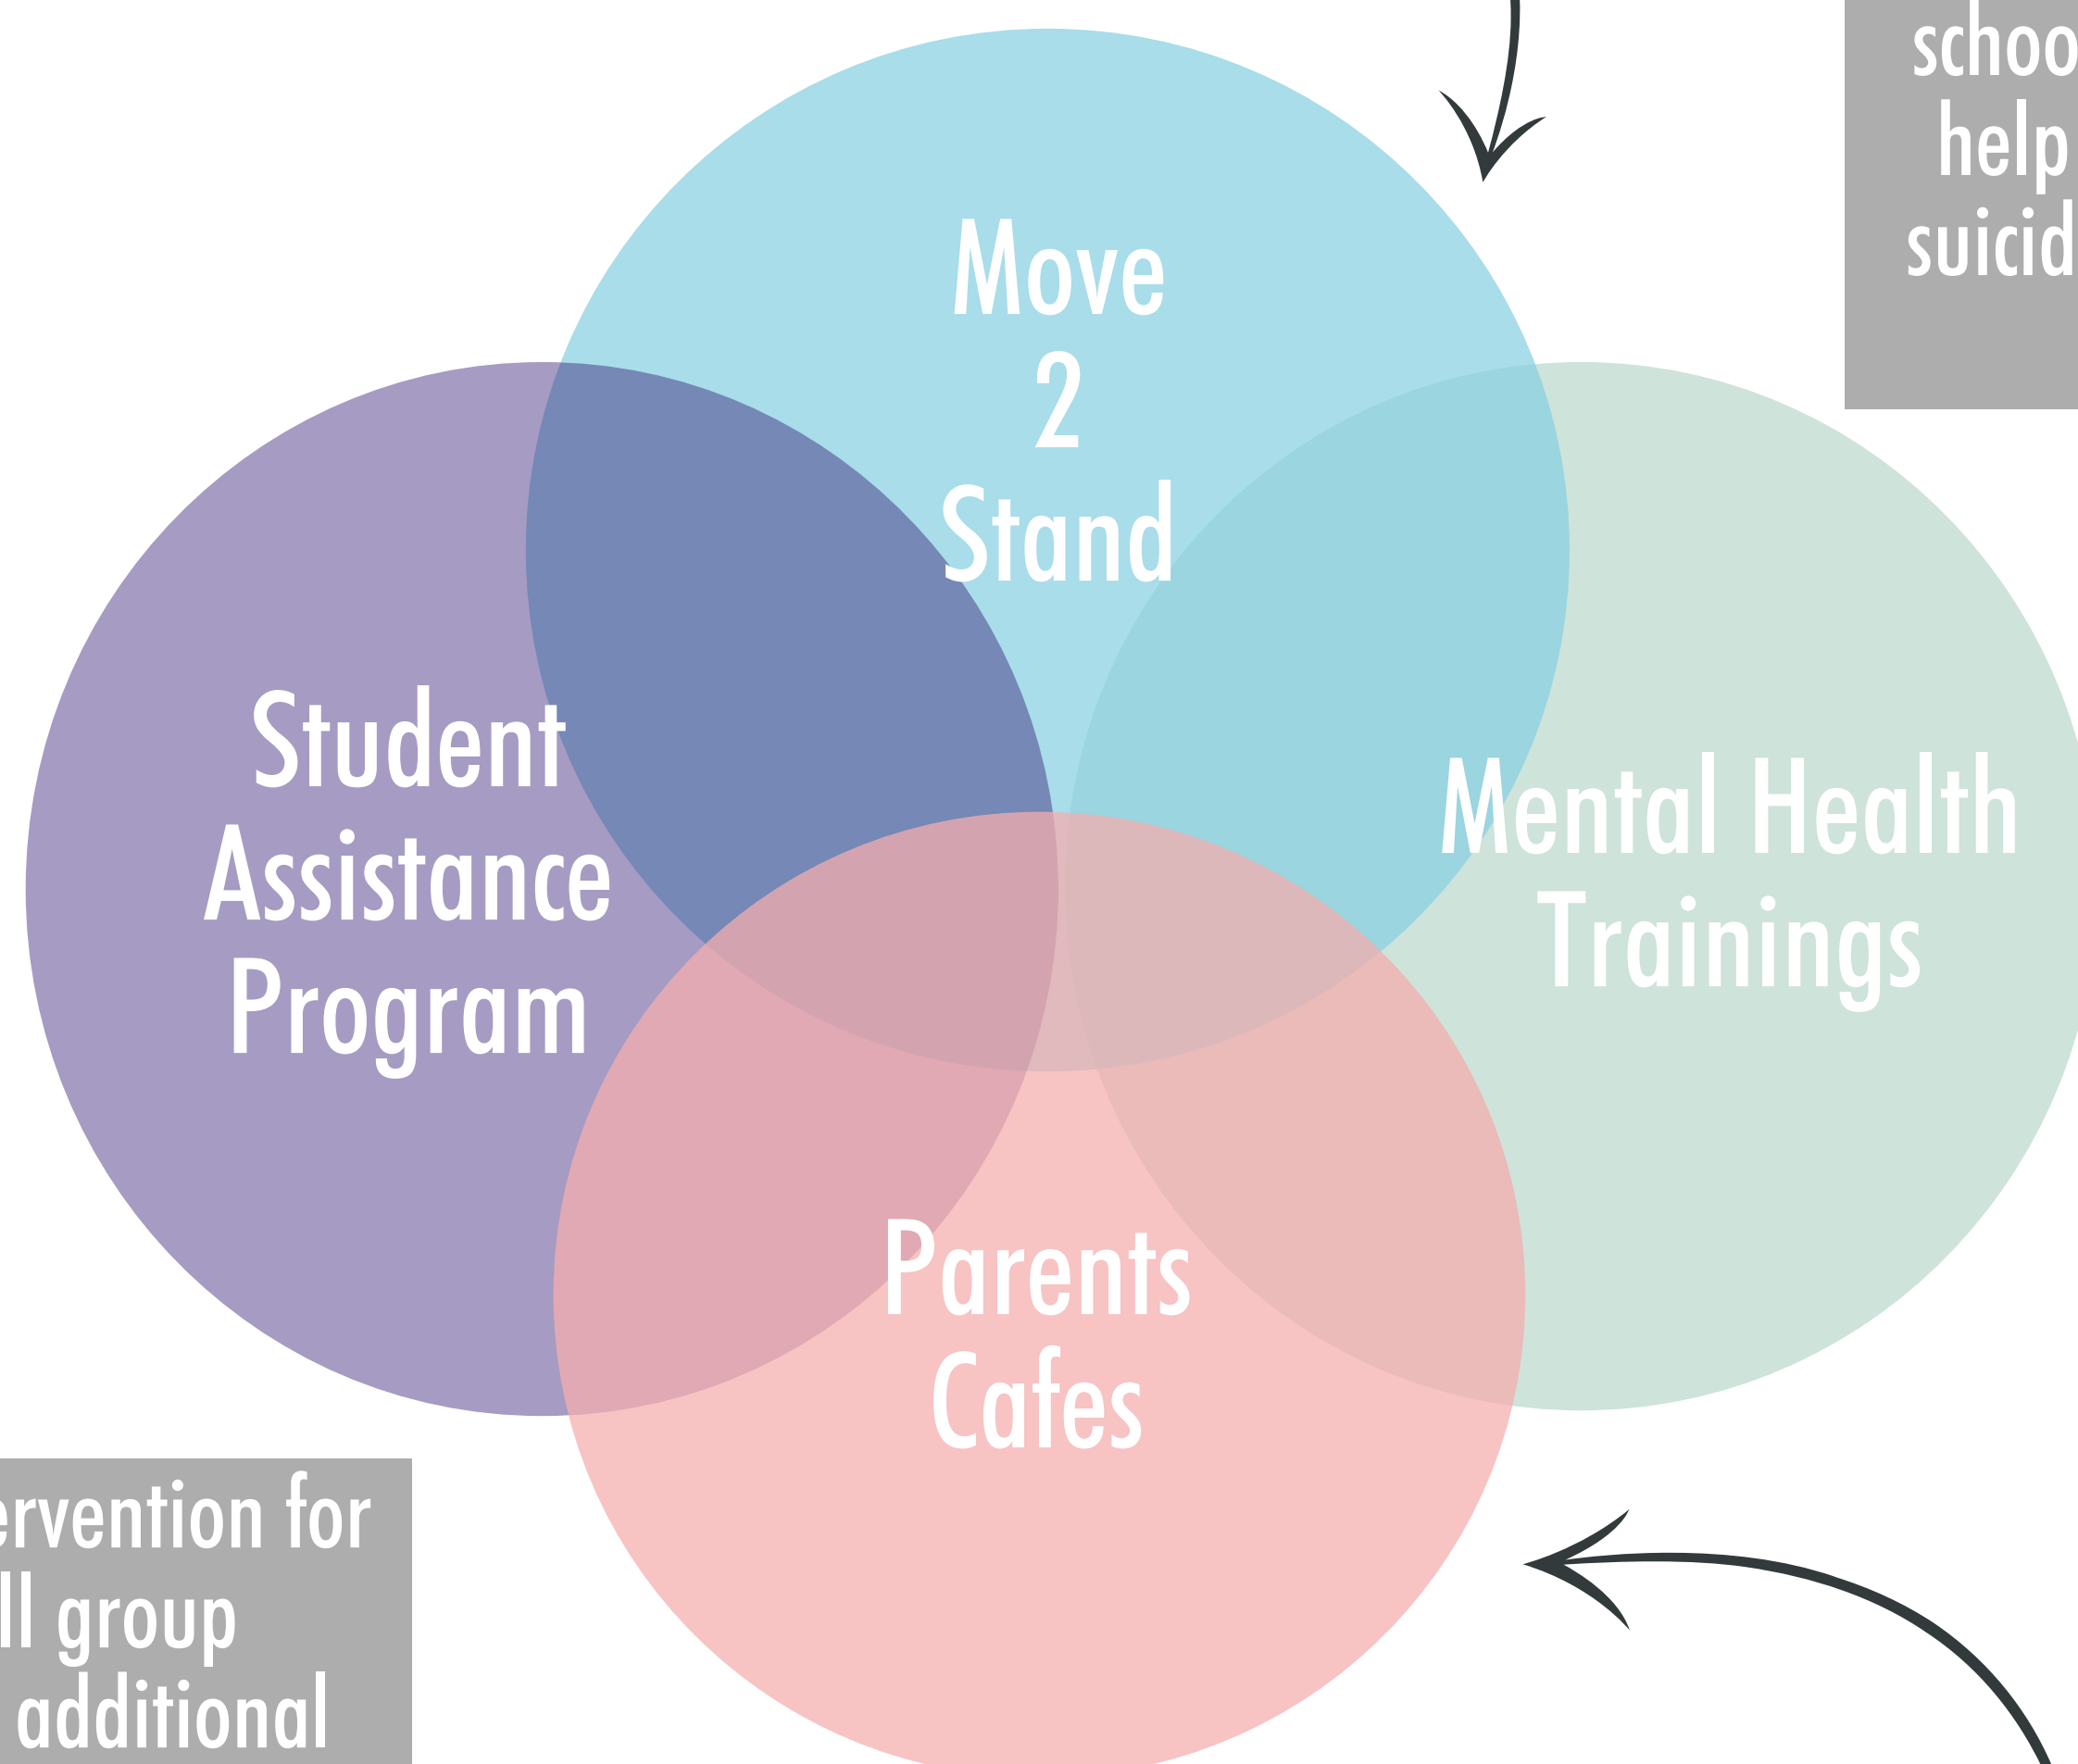

The Milan Cares Initiative is a multi-pronged approach to increase student social and emotional well-being, promote positive school climate, and link school and community capacity to improve school outcomes for K-12 students.

## Plan of Action

Move2Stand is a student-led initiative that works to develop empathy across the student body by challenging students to consider their attitudes toward bullying and actions toward others.

Mental Health training equips students, school staff, and parents how to effectively help an adolescent who is contemplating suicide or facing a mental health/addictive episode.

SAP counselors provide early intervention for at risk students, conduct small group counseling, and link students to additional services in the community.

Parent Cafes promote parenting resilience, social connections, concrete support, knowledge of parenting and child development, and child social and emotional competence through peer to peer discussions.
